PROFESSIONAL SUMMARY

AI/ML Engineer and 2× SSIP Grant Recipient with production experience in RAG systems, LLM integration, computer vision, and full-stack AI deployment. Proven ability to ship end-to-end AI applications using PyTorch, LangGraph, FastAPI, and Docker on GCP. Focused on healthcare AI and fintech automation; 32+ public repositories.

TECHNICAL SKILLS

AI & ML: PyTorch, TensorFlow, Scikit-learn, LLM Integration, RAG (Retrieval-Augmented Generation), LangChain, LangGraph, Fine-tuning, Prompt Engineering, Deep Learning, NLP, Computer Vision, YOLO, OpenCV, Hugging Face, Groq API
Languages & Frameworks: Python, C/C++, SQL, R, FastAPI, Flask, Streamlit, Alembic
Tools & Platforms: Pandas, NumPy, Power BI, Google Cloud Platform (GCP), Docker, Git, PostgreSQL, Jetson Nano

EXPERIENCE

Full-Stack AI Developer Intern — Hytech Education, Vadodara May 2026 – Jun 2026

- Architected **Clarix** [Live]: GenAI compliance workspace automating RTS reporting via LLM pipelines and RAG; configurable per consultancy with audit trails and workflow simulation; received Rs. 10,000 stipend.

Backend Developer Intern — DezAI.org (Remote) Jun 2026 – Present

- Building multi-tenant RBAC system across 4 role tiers (Student, Faculty, Admin, Super Admin) for DezAI's EdTech platform using Node.js, NestJS, and Prisma ORM.

Campus Ambassador — Perplexity AI (Remote) 2024 – Present

- Led campus-wide initiatives promoting AI-powered research and LLM-based search tools; organized technical talks on knowledge retrieval and NLP.

AI/ML Core Member — Google Developer Groups (GDG), CHARUSAT 2024 – Present

- Organized 5+ workshops on Google Cloud AI/ML, TensorFlow, and model deployment for 100+ students; mentored juniors on machine learning fundamentals.

PROJECTS

AI Solution Builder — Enterprise AI Code Generation Platform Sep 2026

- Enterprise system converting business ideas and BRDs into production-ready software via LangGraph agents — auto-provisions PostgreSQL schemas, REST APIs, UI sandboxes, and CI/CD pipelines. [Live]

A2A-Firewall — AI Governance Platform Jul 2026

- Inter-Agent Governance Mesh that intercepts, validates, and traces every agent-to-agent message in multi-agent AI systems. [Live]

ExceptionIQ — B2B SaaS Fintech Platform Jun 2026

- Engineered a reconciliation exception orchestration system via microservices (FastAPI, PostgreSQL, Alembic, Docker) automating bank statement ingestion, GL transaction matching, exception routing, and maker-checker approval. [Live]

TribeMind — Real-Time Neural Response Visualization Apr 2026

- Built a SOTA multimodal AI app predicting and visualizing brain neural responses to images, video, and text using Meta's TRIBE v2 foundation model and Groq-powered LLMs for personalized neuroscience reports. [HuggingFace]

Metis — AI-Powered Hiring Platform (Hackathon, 24 hrs) Feb 2026

- Built NLP pipeline to parse resumes and feed structured signals into a conversational AI interviewer that generates personalized questions, scores candidates, and produces an HR-facing leaderboard. [Live]

CBC Analysis — Clinical AI Diagnostic Model Sep – Oct 2025

- Trained ML models (Random Forest, XGBoost, Neural Networks) for disease prediction from Complete Blood Count data; applied SMOTE for class imbalance and clinical-grade evaluation metrics. [Live]

SSIP Grant Projects (2×) 2024 – 2026

- SmartShift:** AI-driven automation platform for MSME workflow optimization — *SSIP Grant, CHARUSAT*.
- Smart Weight-Bearing Walker:** IoT walker with 4 load cells measuring real-time weight distribution and L/R asymmetry; on-board compliance display and Bluetooth app for clinician reports.

EDUCATION

Bachelor of Technology in Artificial Intelligence and Machine Learning

Charotar University of Science & Technology (CHARUSAT), Gujarat 2024 – 2028

CERTIFICATIONS & ACHIEVEMENTS

Certifications: Implementing AI on Jetson Nano (NVIDIA) — Data Science Specialization (Google & Coursera) — DSA Foundations (Coursera) — Problem Solving in C/C++ (HackerRank & NPTEL) — Google Workspace Admin (Udemy)

Achievements: LeetCode Rank #1644 — 2× SSIP Grant Recipient (CHARUSAT) — Active Open-Source Contributor (32+ repos)
